PRODUCT NEWS

Phillips Automated External Defibrillator - A.E.D.

When sudden cardiac arrest (SCA) strikes, the electrical system of the heart short circuits, causing the heart to quiver rather than pump in a normal rhythm. It typically results in the abnormal heart rhythm known as ventricular fibrillation (VF). It usually happens without warning and the majority of people have no previous recognized symptoms of heart disease.

Phillips is the market leader in innovative defibrillation technology. Offering the most complete and trusted solution in resuscitation products, Phillips helps responders treat SCA quickly and effectively wherever it occurs. Rockwest is now an authorized sub-distributor for the Phillips HeartStart defibrillator with the state of Oregon.

This state-of-the-art equipment is now available at a reasonable price to city, county, state, and federal agencies as well as the private sector within the state of Oregon. For further information on the Phillips HeartStart click [here](#). The Phillips HeartStart and accessories cannot be ordered through our web site and must be ordered via telephone at (503) 390-7355 or by FAX at (503) 390-2735.
